

MOTORVATION ENTRANT JUDGING GUIDE

QUICK FACTS

- The vehicle must have been driven by the registered Entrant to be eligible for Motorvation Champion

VEHICLE JUDGING

Entrants wishing to be judged must initially be presented to judging during scrutineering.

ELITE PAVILION

Vehicles that qualify into the Finalist Show will be listed or advised during judging or via text.

The Finalists Show will be held on Saturday and Sunday with the vehicles staying in the pavilion overnight Friday and Saturday but can leave for driving events on Sunday.

Those wishing to participate in the driving events must notify the Chief Steward or Judges before positioning their vehicle in the pavilion. Arrangements will be made for your vehicle to take part in Motorvation Champion driving events

DISPLAYS

Cars that are elevated with stands must have a barrier and there must be a 1.5m space between each vehicle/barrier.

It is recommended low wattage LED lights are used for displays. Entrants must also display caution signs for lights which produce heat and all electrical cords must be safely secured to ensure no trip hazards. All electrical items must test and tagged. This can be done at the Motorvation but you must notify any of the judging staff if required. It is advised you complete this prior to the event.

Any branded signage must be approved by Motorvation prior to displaying. Signage will be removed if deemed unsuitable.

JUDGING CRITERIA

- Quality of workmanship
- Innovation
- Degree of difficulty
- Cleanliness
- Presentation

Vehicles must be presented ready for judging, including unlocked and the bonnet open. The judges will only score what they can have access to. Entrants are encouraged to advise the judges a brief description of any detailed workmanship or modifications. When judging commences, entrants must step back from the vehicle.

Motorvation defines a street machine as a post-1948 street driven vehicle that has been restored, modified or customised.

To further identify other vehicle types, Hot Rods are pre-1948 vehicles given similar re-build treatment or as described by the ASRF handbook.

Points are awarded in the following areas taking into consideration:

BODYWORK assess the preparation of the body before paint is applied. Consideration is also given to gaps, straightness, quality and degree of difficulty of modifications to the body.

PAINT includes preparation, primer and overall finish in all areas of the vehicle.

STANDARD PAINT is a solid, metallic or pearl colour available on OEM vehicles.

INTERIOR key areas are creativeness, workmanship and attention to detail. Consideration all items visible from the doorjambs, dash, floor coverings, rear parcel, hood lining, seats, modified/fabricated panels, use of materials and fitment.

UNDERCARRIAGE includes the floor pan, substructure, driveline components, suspension components and all visible brackets, fuel lines etc on the underside of the car

ENGINE BAY reviews the fitment and finish of engines and accessories and all other components in the engine bay, the overall detail and enhancement.

ENGINEERING covers all non-factory modifications that would require a degree of manufacturing including driveline and suspension components.
